SUMMARY

Skilled Full-Stack Developer with 1.5+ years of experience at Technoboot Pvt Ltd, specializing in MongoDB, Node.js, React, and Express. Proficient in GraphQL and REST APIs, delivering high-quality applications through collaboration and agile methodologies. Completed a 3-month Java internship at Quantumware Pvt Ltd, further enhancing problem-solving skills. Passionate about innovation and eager to contribute technical expertise and creativity to dynamic teams.

WORK EXPERIENCE

- Junior Software Engineer, Technoboot Pvt Ltd** **July 2023 - Present**
 - maintaining web applications using Mongo Db, Express, React and Node.js, improving functionality and user experience.
 - Collaborated with senior developers to identify and resolve bugs, ensuring smooth software performance and enhancing code quality.
- Associate Software Engineer, Technoboot Pvt Ltd** **Mar 2023 - Jun 2023**
 - Developed and optimized software features in the MERN stack, improving performance and user experience.
 - Collaborated with cross-functional teams to design and maintain scalable applications, leading to a 10% improvement in project delivery time.
 - Conducted code reviews, debugging, and technical support, which increased code quality and reduced errors by 15%.
- Software Intern, Quantumware Pvt Ltd** **Mar 2022 - May 2022**
 - Assisted in developing and testing software applications, gaining proficiency in MERN
 - Collaborated with team members on debugging and troubleshooting tasks, contributing to successful project completions.

PROJECT EXPERIENCE

- CIWA-DATABASE | <https://icar-public.web.app>** **May 2024 - Sep 2024**
 - Led the development of the backend system using Node.js, Express, and MongoDB to manage large datasets, providing filtered access to agricultural data for policy-making.
 - Implemented efficient data retrieval mechanisms that reduced query time by 25%.
- Examys | <https://examys.com>** **July 2023 - March 2024**
 - Examys is an innovative project transforming the creation, management, and delivery of educational content.
 - Designed to be an all-encompassing platform for students and educators, similar to a comprehensive textbook.
 - Working on the backend and Redux, utilizing the MERN stack to build scalable and efficient backend infrastructure.
 - Focused on managing state effectively with Redux to ensure a seamless user experience.

EDUCATION

- Master In Computer Application | Utkal University** **July-2022**
- Bachelor of Science in Mathematics | Christ College** **Aug -2020**

TECHNICAL SKILLS

- Frontend: React, JavaScript
- Backend: Node.js, Express
- Databases: MongoDB, SQL
- Others: GraphQL, Java
